

MINI EXCAVATOR BUCKET RANGE

We hold substantial sales stock of common digging and ditching buckets but because we manufacture in-house, we have the ability to react to customer demand for special, purpose built equipment. Rather than simply try to sell what we have in stock, we also offer customers the ability to specify the correct kit to get their work done quickly and efficiently.

We can offer a quick turnaround on custom designed buckets and attachments.

Manufactured by our in-house Engineering facility in Rugeley, Staffordshire. 

We've been selling mini digger buckets since 1991 and have built up a reputation for value, quality and service.

BUCKET TEETH

All digging buckets feature two-leg, bolt-on, cast teeth as standard.

- 900mm (36") Ditching
- 760mm (30") Ditching
- 600mm (24") Digging
- 450mm (18") Digging
- 300mm (12") Digging
- 230mm (9") Digging
- 150mm (6") Digging

SIDE CUTTERS

All 0.75 to 3t digging buckets feature forged side cutters as standard.

Massive stocks of common types and sizes of excavator bucket in stock in our Rugeley warehouse for immediate despatch.

600mm (24") Digging Bucket, 1.0 to 1.9 tonne weight class

EXCAVATOR BUCKET MANUFACTURING

Along with our stock of common sizes and types of digger buckets, our in-house manufacturing facility also holds extensive reserves of raw materials, in order to respond quickly and efficiently to customer demand, without compromising quality. By producing in the UK, not only can we control quality, but also offer far greater flexibility.

Steel profiles, and pre-cut hollow sections, ready for fabrication.

Pre-bent, bucket back plates, formed in-house on our CNC press brake,.

Our skilled fabricators can produce one-off, specialist buckets, like this V-Ditcher to suit exacting customer requirements.

1,200mm (48") Ditching Bucket, 2 to 3 tonne weight class

MINI BUCKET RANGE

Common, standard widths and types of buckets shown below. Since we manufacture our own buckets, we can and do produce custom width buckets allowing you to meet job specific trench widths, saving time and money.

MICRO BUCKETS *0.5 to 0.9 tonne weight class*

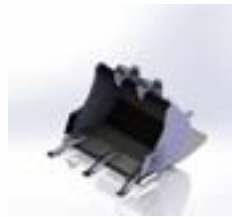

150mm (6'')
Digging Bucket

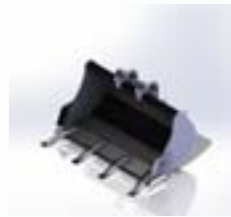

230mm (9'')
Digging Bucket

300mm (12'')
Digging Bucket

450mm (18'')
Digging Bucket

600mm (24'')
Digging Bucket

760mm (30'')
Ditching Bucket

1t BUCKETS *1.0 to 1.9 tonne weight class*

150mm (6'')
Digging Bucket

230mm (9'')
Digging Bucket

300mm (12'')
Digging Bucket

450mm (18'')
Digging Bucket

600mm (24'')
Digging Bucket

760mm (30'')
Ditching Bucket

900mm (36'')
Ditching Bucket

2t BUCKETS *2.0 to 3.0 tonne weight class*

230mm (9'')
Digging Bucket

300mm (12'')
Digging Bucket

450mm (18'')
Digging Bucket

600mm (24'')
Digging Bucket

760mm (30'')
Digging Bucket

900mm (36'')
